

# OUR Election Priorities 2023

Increased funding needs to flow to all parts of the province as it relates to transportation, services to older adults, support and security. Financial commitments need to be documented and followed up on, while progress reports are routinely shared.

A "For Us, With Us" mentality needs to be developed when planning around older adults. Inclusion on important decisions by those the decisions will impact is key to transparency and ensuring that needs are accurately met.

More funding has to be applied to critical areas such as long term care, staffing, advocacy for a National pharma-care plan and transportation in all communities throughout the province.

All our points and concerns are shared in the Provincial Seniors Strategy ([https://gov.mb.ca/seniors/docs/seniors\\_strategy\\_2023.pdf](https://gov.mb.ca/seniors/docs/seniors_strategy_2023.pdf)) and we are driven by this document and holding all elected officials accountable to following through with the goals of this document.

1

Transparent funding plans on all commitments from the Province with regular updates to stakeholders and Manitobans.

2

"For Us, With Us" mentality which includes older adults on all committees making plans for that demographic of the population

3

Increased funding and support to older adult needs, this is the largest demographic in the Province.
