

About SpacesShared:

SpacesShared (formerly RoomEaze) exists because we believe there is a significant opportunity to scale existing models which pair seniors with unused bedrooms to postsecondary students struggling to find housing. These models exchange a student's company and support with basic tasks around the home (such as yard work, cleaning, basic maintenance, cooking, etc.) for access to housing at reduced rent. By enabling a value exchange beyond money, Ontario can solve two of its most challenging problems:

- 1) Cost-effectively enabling Ontarians to age at home; and,
- 2) Expanding access to affordable and safe housing for students.

Existing models are not scalable as they are resource-intensive to both match and maintain the arrangements. By leveraging technology to match seniors (hosts) with domestic and international students (guests), and to support regular check-ins with participants, we believe SpacesShared can move these arrangements from niche to the mainstream.

The SpacesShared Executive Team

CEO Rylan Kinnon | CTO Sudeep D'Souza | CXO Jackie Tanner

As public policy, technology development, and social work professionals, our team has seen first-hand the potential for technology to drive positive social and economic change.

Security, privacy, and safety of users

Liability and cyber insurance	Validation of host and guest identities	Criminal background check for hosts and guests	FIPPA and PIPEDA compliant	All user data hosted in Canada	Regular check-ins with hosts and guests
